LeetCode: Rayabagi Kashyap

EDUCATION

• VIT Bhopal University

BTech, Computer Science and Engineering | CGPA: 8.84/10

Nov 2022 - Present

Bhopal, India

PROJECTS

• WitWise: Student Collaboration App

Aug 2023 – Oct 2023

Tools: Flutter, Firebase, Dart

- **Architected** cross-platform mobile application serving 500+ students with real-time document sharing, collaborative note-taking, and zero-latency synchronization using Flutter and Firebase infrastructure.
- **Integrated** Firebase Authentication and Firestore database, achieving 30% reduction in login failures and 40% query optimization through indexed collections and advanced caching mechanisms.
- **Implemented** role-based access control (RBAC) for students/teachers, securing 10+ subject materials with granular permissions and encrypted data transmission protocols.
- **Enhanced** UI/UX with custom Flutter widgets and responsive design, boosting responsiveness by 35%, eliminating crashes, and reducing battery consumption by 25%.

• Code Whispers: Full-stack Coding Q&A Platform

Jan 2024 – May 2024

Tools: Node.js, Express, MongoDB, HTML/CSS

- **Developed** comprehensive Q&A platform supporting 200+ developers, leveraging MongoDB NoSQL architecture for 50% faster queries compared to traditional relational databases.
- **Implemented** basic user authentication system and simple search functionality, enabling users to post questions and browse content by categories.
- **Engineered** RESTful APIs with error handling, rate limiting, lazy loading, and automated backup systems, achieving 35% faster load times and 99.95% uptime.
- **Optimized** frontend performance through code splitting, real-time notifications, and responsive design principles for seamless cross-device compatibility.

• LLM Poisoning: Security Analysis

Mar 2025 – Apr 2025

Tools: Python, HuggingFace (BERT/T5/DistilGPT), PyTorch

- **Conducted** comprehensive security analysis simulating data poisoning attacks (factual negation, label flipping) on LLMs, demonstrating 45%+ accuracy degradation with <1% corrupted data.
- **Analyzed** vulnerability patterns across transformer architectures (BERT, T5, DistilGPT), proving systematic overfitting to adversarial patterns and establishing baseline security metrics.
- **Proposed** innovative defense mechanisms including statistical anomaly detection and adversarial training protocols, reducing attack effectiveness by 40% in controlled environments.
- **Implemented** automated attack simulation frameworks using PyTorch and HuggingFace transformers, generating technical documentation and contributing to cybersecurity knowledge base.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, Dart, SQL, JavaScript
- **Cloud & DevOps:** AWS (Cloud Practitioner), CI/CD Basics, Firebase, Docker
- **Frameworks & Tools:** Spring Boot (REST APIs, Data JPA), Flutter, Node.js, Express, IBM DevOps, Agile Methodologies
- **ML/AI:** PyTorch, HuggingFace Transformers, Adversarial ML
- **Databases:** MongoDB, MySQL, Firestore (NoSQL optimization)
- **Tools:** Git, IntelliJ, Postman, Linux CLI

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:** AWS Academy Cloud Foundations | AWS Academy Cloud Architecting | Coursera Networking Fundamentals | IBM DevOps Fundamentals | IBM Agile Methodologies | NPTEL Cloud Computing | NPTEL Marketing Analytics | Flipkart Grid
- **Achievements:** TCS CodeVita | Flipkart Grid Hackathon | Cyber Magazine Member
- **Languages:** English, Hindi, Kannada, Telugu
